

# **Animals and Roads**

## **Contents**

### **1. Introduction 7**

### **2. Space and movements in the life of animals 9**

2.1. Spatial requirements of animals 9

2.2. Animal movements and migrations 11

### **3. Movement and dispersal corridors of animals 16**

3.1. Fragmentation of forests in Europe 16

3.2. What are movement and dispersal corridors? 17

3.3. Creation and protection of a movement corridor network 18

### **4. Impact of roads on animals 30**

4.1. Effect of ecological barriers and fragmentation on animal populations and their habitats 31

4.2. Mortality of animals on roads 35

4.3. Destruction and degradation of habitats 37

4.4. Susceptibility of various groups of animals to road effects 38

4.5. Conflicts between existing and planned road network and animal dispersal corridors 39

### **5. Protection of animal populations against the negative influence of roads 43**

5.1. Proper location and construction of roads 43

5.2. Reduction of animal mortality on roads 43

### **6. Animal crossing structures – wildlife passages 46**

6.1. Functions of wildlife passages 46

6.2. Types and design parameters of wildlife passages 47

6.3. Characteristics of passages affecting their use by animals 60

6.4. Arrangement and maintenance of passages 62

6.5. Planning proper types of wildlife passages 64

6.6. Required permeability of roads and the corresponding numbers of wildlife passages 67

6.7. Planning wildlife passages in the procedure of road investment plans 71

6.8. Proposed system of monitoring wildlife passages 73

6.9. Assessment of wildlife passages constructed in Poland to date 79

## **7. Legal aspects of protecting wildlife against adverse effects of road and railway infrastructure 83**

7.1. Legal acts regulating protection of ecological connectivity 83

7.2. Strategic environmental impact assessments of plans for road and railway infrastructure 84

7.3. Environmental impact assessment of road and railway infrastructure projects 85

7.4. Verification of environmental impact assessment of road and railway projects 88

7.5. Preventing damage from road and railway infrastructure 89

## **8. Literature 91**

8.1. Sources cited in the text 91

8.2. Other recommended readings 93
